Subject : Price Increase Announcement

Dear Valued customer

Aditya Birla –Epoxy Division will be raising the prices globally for all its “ EPOTEC” range of epoxy resins that includes the Liquid , solid and solution range effective from 1<sup>st</sup> April 16.

The Prices , will be adjusted by between \$100/MT to \$110/MT depending on the product from April ,1<sup>ST</sup> 2016 OR as contract allows.

The price revision is inevitable, as prices of Bisphenol A ( BPA) one of the key raw material, has been escalating steadily for the past one month followed by Upward movement in crude oil and benzene prices . Several BPA plants across the Asia are either carrying out scheduled maintenance or are operating at reduced levels.

Thank you for your understanding and look forward your support

B.Venkataraman  
Sr VP-Global Sales and Marketing,
